A Note from Mr. Yuk

We mark some plants in the catalog with a Mr. Yuk sign. These are plants known to be toxic to humans in some way. We do this because we care about your health, but the issue is complex, so please read the full-length article about this on our website, www.FriendsSchoolPlantSale.com/poisonous-plants.

There are, however, a few plants in the sale that are particularly poisonous, capable of causing serious illness or death to humans:

Common name	Botanical name	Catalog numbers
Angel's Trumpet	<i>Datura</i>	A053–A055
Castor Bean	<i>Ricinus</i>	A098–A100
Foxglove	<i>Digitalis</i>	P215–P219
Monkshood	<i>Aconitum</i>	P435–P436
Angel's Trumpet	<i>Brugmansia</i>	U059

It is generally a bad idea to chew on ANY plant that is not clearly for human consumption, Mr. Yuk sticker or no. We get expert advice on this issue, but individuals vary, and experts do not know everything.

What about medicinal plants? 🍷

Never assume that a medicinal plant is safe or nontoxic. Many highly poisonous plants or plant parts contain medicinal compounds that are extracted from them in specific ways.

Several of the highly toxic plants listed above are also medicinal (Angel's Trumpet, Castor Bean, Foxglove). Friends School Plant Sale does not recommend the use of any plant marked as medicinal for self-medication or treatment of others.

H137 Roselle *Hibiscus sabdariffa* 🌿

Native to West Africa and grown for the plump red coverings around its seedpods. As days shorten, the plant produces 3" white to pale yellow flowers with dark red centers. After the seedpods start to form, harvest the pod coverings (remove the seedpods inside) and use them to make a refreshingly zingy tea. Seedpod coverings are also used to make jam, cranberry-like sauces, and many other foods worldwide. The growing tips and leaves are a tangy addition to salads, stir-fries, and soups. Because of our short growing season, you may need to bring the plant inside for the seedpod coverings to ripen completely. We are not sure if this tender perennial can be overwintered indoors or not. 48–84" h ○ 🍷 🌱 🌱
